PROFESSIONAL EXPERIENCE

Software Developer

Luminus Technical University College - Amman, Jordan

July 2025 – November 2025

- Developed and maintained mobile application features using Flutter.
- Integrated RESTful APIs and worked with real-time data in mobile applications.
- Contributed to team discussions by proposing enhancements and technical solutions.
- Conducted app testing and identified UI/UX issues, ensuring smooth user experience across devices.
- Assisted in building UI components following clean code and best practices to improve app performance and readability.

TRAINING

Training Program
Inspire For Solutions Development - Amman, Jordan
Internship, July 2024 – Aug 2024

- Gained hands-on experience with the MERN Stack (MongoDB, Express.js, React.js, Node.js)
- Worked with HTML, CSS, JavaScript, Node.js, Express.js, and RESTful APIs

EDUCATION

Bachelor of Technology (B.Tech), network systems and security engineering
Albalqa Applied University, Amman, Jordan Oct 2020 - Feb 2025.

CERTIFICATIONS

The Modern Web Developer Bootcamp — Udemy. Jun 2024.

The Modern Javascript Bootcamp — Udemy. Jul 2025.

Flutter Mobile Application Development — Luminus Technical University College. Nov 2025.

PROJECTS

Gmail Clone — Personal Project
Developed a fully functional email web application inspired by Gmail using React.js and Redux for state management. Implemented Google Authentication using Firebase Auth and enabled real-time email sending and receiving with Cloud Firestore.

Built a responsive and user-friendly interface with React Router for navigation and React Hook Form for form handling and validation. Integrated Firebase as backend for authentication and database, ensuring real-time data updates across the application. Deployed the application using Firebase Hosting.
Live Demo: https://clone-e49c1.web.app/
Source Code: https://github.com/faris21dev/gmail-clone

LinkedIn Clone — Personal Project
Developed a fully functional social networking app using React.js and Redux for state management. Implemented user authentication using Firebase Auth and real-time posts with Cloud Firestore. Designed a responsive UI with dynamic feeds, post creation, and sidebar widgets. Deployed the application on Firebase Hosting.
Live Demo: https://linkedin-clone-672fb.web.app/
Source Code: https://github.com/faris21dev/linkedin-clone

Gym Management System
Developed a Gym Management System web application to manage member registration, subscription management, class scheduling, and trainer assignments • Technologies: PHP, MySQL, Apache (XAMPP).
